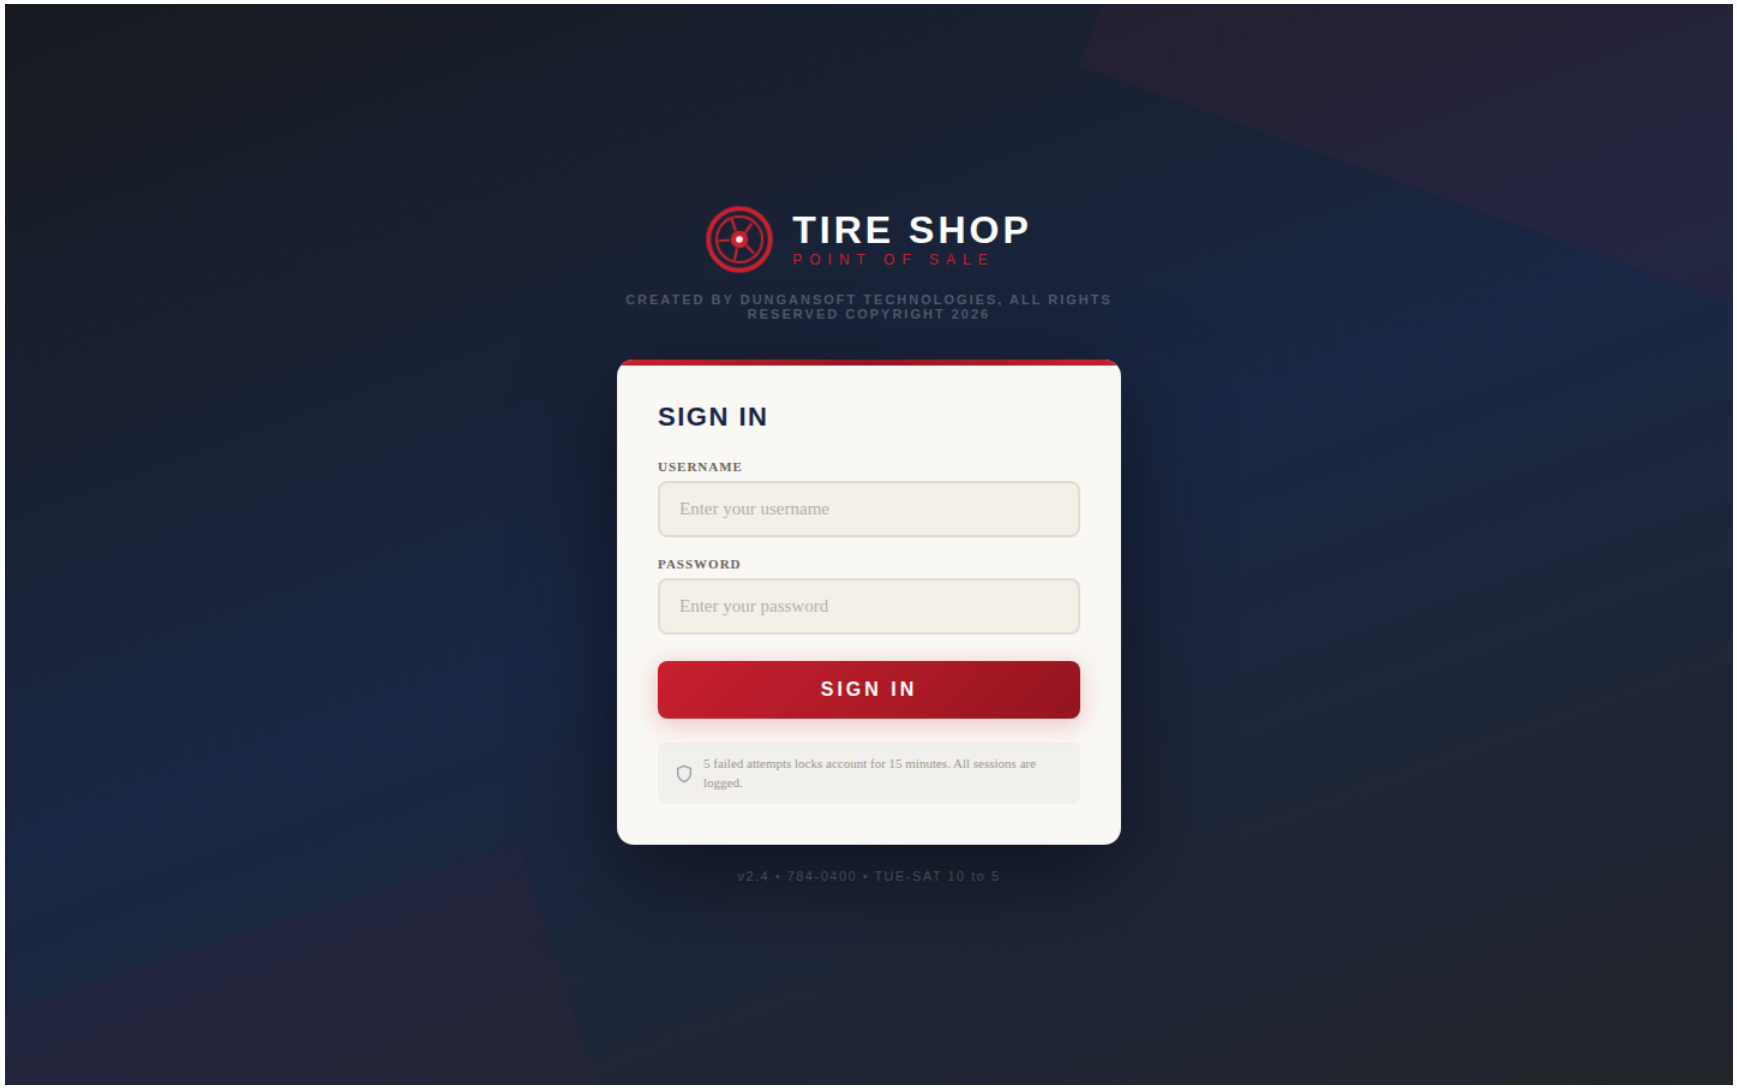
March 2026

Login Screen

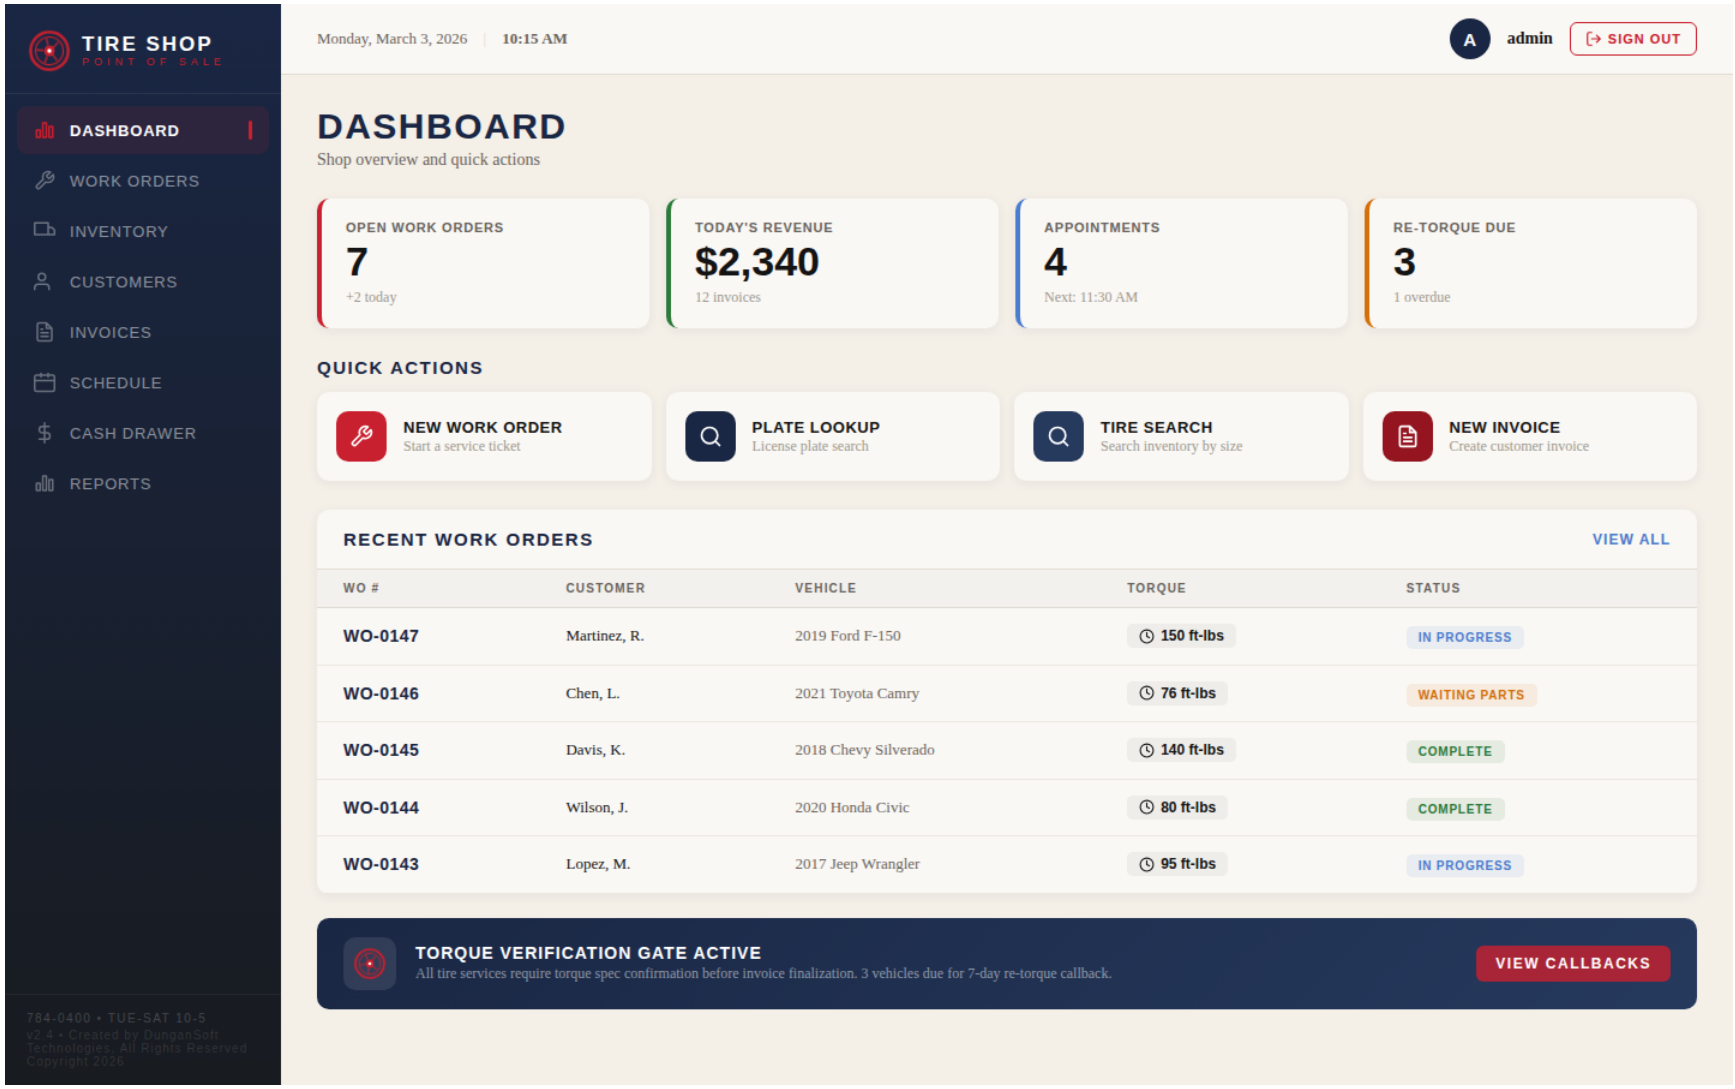
Secure authentication with RBAC role assignment. Account lockout triggers after 5 failed attempts (15-minute cooldown). All login events are written to the audit trail. Color palette and typography derived from the shop storefront signage.



Login page: navy/red palette, Oswald + Bitter typefaces, tire tread texture overlay

Dashboard / Landing Page

Primary operator view after authentication. Fixed sidebar navigation with 8 modules. Top-level stat cards for open work orders, daily revenue, appointments, and re-torque callbacks. Quick action buttons for the four most common workflows. Live work order table with torque specifications per vehicle. Torque verification gate banner with callback queue access.



Dashboard: sidebar navigation, KPI cards, quick actions, work order queue, torque gate banner
